

REMARKS

The claims have been amended to correct the multiple dependencies therein. Applicants submit herewith a substitute specification to replace the verified translation filed simultaneously herewith. The substitute specification merely replaces and/or adds headings to conform with standard U.S. Patent Practice. A marked-up version of the specification is also provided to show the changes made to the translation. The substitute specification includes no new matter. Examination on the merits is requested.

Respectfully submitted,

Jeffrey L. Costellia
